UniRouter Dashboard v2 Wireframe

Version: 1.0

Status: Ready for Design & Frontend

Target User: Enterprise AI Platform Team

Primary Goal: Understand enterprise AI activity in under 10 seconds.

Secondary Goal: Identify anomalies in under 30 seconds.

Dashboard Philosophy

Dashboard is not a settings homepage.

Dashboard is not a reporting center.

Dashboard is an operational overview of enterprise AI activity.

Every section must answer:

What is happening?

Is it healthy?

What needs attention?

Dashboard Success Test

A new operator should answer:

What is the current traffic volume?

Within 5 seconds.

Is the platform healthy?

Within 10 seconds.

Which models dominate usage?

Within 15 seconds.

Which provider is unhealthy?

Within 20 seconds.

What happened recently?

Within 30 seconds.

If any answer takes longer than this, the dashboard has failed.
